EZYLAY FRAMING SYSTEMS

In most situations glass blocks need to be contained within a perimeter frame.

Glass Blocks Queensland's own installers can complete your project or, we can provide D.I.Y. kits for the home renovator or builder. Our Ezylay Systems with mortar or silicone options for curved or straight panels have been designed in Australia and make installing glass block panels easy. Kitsets come with full instructions, and the easy-to-use components make installation quick, accurate and sturdy, with a professional finish.
